

Merck: The multiplatform biomarker provider

At Merck we believe in the right tool for the job rather than a one size fits all approach. Utilising a range of assays and platforms we can assist our customers select the method that best fits their purpose. Utilising our assay development expertise and our partners instruments we look forwards to offering your lab the following capabilities:

- [MILLIPLEX](#)-Multiplex Biomarker analysis using Luminex xMAP technology
- [GyroMARK HT](#)- High precision, automated sample analysis with Gyros.
- [Erenna](#)- High sensitivity single end point assays with Singulex.
- [ELISA and RIA](#)- Single end point assays for Metabolic and Neurological research.

Find out more about our highly validated off the shelf assays through our web site or our regularly updated [Analyte Quarterly](#). If you a problem that only a [Custom Solution](#) can address, get in touch, we would look forwards to discussing your requirements!
